

Information relating to CE

Thank you for taking time out to read the previous documents issued by Owlett-Jaton regarding CE, if for any reason you did not see them, please ask your contact at your local O-J sales office for a copy.

A list of product groups containing items available from Owlett-Jaton carrying the CE mark is detailed below, this is by no means a definitive list and over time will evolve as the Construction Products Regulations change. If you require a listing by item, please ask your sales contact.

All DoP's are available for download on OJ Trade, if you do not have access to the internet, please request the relevant DoP from your O-J sales contact. It is also worth mentioning that all DoP's issued should quote one of the test houses from the list of notified bodies authorised to test against the relevant harmonised standard, if it does not, then the DoP is not valid.

Description	Detail
